TECHNATION^{CA}

<https://technationcanada.ca/>

As the leading national technology industry association, our mission is to set Canadian businesses apart in a global market while connecting prospective workers, industry leaders and government officials from coast to coast. Through up-skilling and re-skilling programs, we are bridging the gap of digital skills needed now and for the future.

Criteria

This student innovation challenge asked teams of students to develop a data-driven visual summary that highlights disparities, patterns, and projections related to AI, diversity, and economic resilience. Teams then created a prototype, policy proposal, public awareness strategy, or other creative concept to address the inequities they identified. The challenge took place from September-November 2025 and was open to all post-secondary students in Canada.

This individual's team placed in the top 5 of all participating teams.
